

DAVIK'S QUALITY POLICY

Davik's management is committed to quality and will do its utmost to ensure customer satisfaction and to promote continuous improvement in the company's business results.

The company is focused on the customers' needs, and will meet clients, regulatory and legal requirements. The organization's quality system meets ISO 9001 standards and applies a systematic approach to identifying strengths and weaknesses. The company advocates technological innovation of its products and services in the field of packaging products and adhesive tapes.

This policy will be reflected in the contribution of managers in an increased effort to achieve continuous improvement and quality as a way of life. The company will develop the capabilities of the employees and create a suitable work environment for their needs that promotes mutual respect, fairness and equality.

The organization applies a systematic approach to identify and implement methods for addressing risks in areas that can affect product and service compliance. The quality system will be available to employees and stakeholders at all times.

This policy will be circulated and explained within and outside the organization at the request of external parties, business partners and other concerned interested groups.
